Purpose™

FITS EVERYONE. GOES EVERYWHERE.

The way people work is changing. Less time is spent in isolation, while more time is spent working together. We understand that collaboration can happen anywhere, anytime. As a result, companies need a seating solution that's ready for anything and anyone. Say hello to Purpose. With only a single adjustment for seat height, Purpose is designed to automatically respond to each user's body. No tilt, tension or sync adjustments to master. The result is comfort and support the moment you take your seat.

A. SHARED WORKSTATIONS

With the rise of mobile workers and the need for touchdown areas, it's important to have workspaces that can be used by a wide variety of people and comfortably support extended periods of concentrated work.

B-C. COMMUNITY SPACES

Research shows that a majority of the workday is now spent collaborating with others. Purpose task chair and stools work together to deliver the perfect combination of planned and impromptu spaces.

D. ZONE 1 - BACK SUPPORT

The first flex zone responds to user movement to deliver constant back and lumbar support.

E. ZONE 2 - BACK RECLINE

The second zone facilitates back recline.

F. ZONE 3 - SEAT FLEX

The third zone flexes to evenly distribute pressure points in the seat for enhanced comfort.

G. CONFERENCE ROOMS

With Purpose, every meeting can start by sitting down and getting right to business. Because the unique design is optimally balanced to comfortably support the general population, everyone gets the comfort they need without the hassle of adjustments.

H. TRAINING AREAS

Purpose is uniquely suited to training and multi-purpose areas that facilitate a wide variety of users for extended periods of time. Purpose is engineered to intuitively and ergonomically support the user as they shift and move, so they remain comfortable and maintain focus.
