CARE & MAINTENANCE INSTRUCTIONS

Wipe with a damp cloth using water or gentle, nonabrasive cleaner. For guaranteed safety, patch test with diluted cleaner before wiping entire surface. Wipe dry with a clean cloth.

DISINFECTING

Disinfect using a ratio of 5 tablespoons (1/3 cup) bleach per gallon of water OR 4 teaspoons bleach per quart of water. This solution ratio is consistent with CDC instruction for virus and bacteria control. Do not soak or rub the diluted bleach solution into the 3F material. Instead, spray apply the diluted bleach solution as a mist and let sit for at least 1 minute before wiping off any cleaning solution residue with a damp cloth. For guaranteed safety, patch test diluted bleach solution in an inconspicuous place on the product before applying widely.
